# First Day Checklist

## Access and Review the Syllabus and Course Guide

Your course's syllabus and course guide are located in your course's Welcome to the Course and Getting Started module in your Blackboard classroom. Review the:

- Syllabus for a schedule of all assignments that are due during the course and the points allocated to each assignment
- Course guide for important information about the learning outcomes, career relevant skills, how you might use career-relevant skills in the workplace, and much more

## Review the Academic Policies and Procedures

Policies and procedures are designed to help you fit school into your busy life. They include important information about the course, such as attendance, grades, academic resources, academic integrity, late assignments, and disability services. It can also be accessed in your course by navigating to Details & Actions on the sidebar menu and selecting the Tools & Resources section of your Blackboard classroom.

## Introduce Yourself

Post an introduction about yourself in the Meet Your Faculty Member and Peers! discussion located in your course's Welcome to the Course and Getting Started module. This discussion is where you will get to know your faculty member and classmates. Many faculty post a welcome video to their class, and that may help you put a face with your faculty member's name.

## Review Week 1

Review your course's Week 1 content, including the discussion, any assignments/assessments, and learning activities. If you have any questions about your course, reach out to your faculty member directly.

## Preview the Summative Assessments

Summative assessments are used to evaluate your learning during a course. They generally have a higher point value than other assignments, and they provide you with the opportunity to demonstrate course outcomes. Your faculty member will evaluate your individual performance according to a specific benchmark or learning outcome using a rubric.
